

ADEG Zell am See GmbH is a large and well-known Cash & Carry, members-only, **wholesale supermarket chain in Salzburg and Tyrol, Austria**. The chain mainly serves hotels, catering companies, restaurants, canteens, and bars. The stores carry all types of food, beverages and specialized non-food products.

7-9% Energy Savings at AGM Wholesale Supermarkets in Austria!

ADEG Zell am See GmbH was interested in reducing its high annual consumption of about 6,000,000 kWh combined from all 5 locations – which was attributed to lighting loads used for over 10 hours a day in the stores, as well as 24/7 significant refrigeration loads. Additional goal was to reduce the immense maintenance costs due to failure and extensive bulbs' replacement.

ComEC 800A and 630A units were deployed by **Elektro Schartner** throughout the chain to meet the customer's requirements. The **PowerSines' products generated 7-9% reduction in energy utilization** in each of the five sites.

“Die Umsetzung der ComEC Lösung gemeinsam mit der Fa. Schartner war für uns ein wichtiger Punkt zur Steigerung unserer Energieeffizienz. Wir sind mit dem Ergebnis sehr zufrieden, die prognostizierte Energieersparnis wurde sogar übertroffen.”

Mr. Rudolf Schwarzenbacher
